DEPARTMENT: INFORMATION TECHNOLOGY

MATRIC NUMBER: RUN/IFT/23/15468

COURSE: IFT 301 – INTRODUCTION TO WEB DEVELOPMENT.

Assignment

Differences between a **SESSION** and a **COOKIE**?

What is a Session?

A session is a way of storing user information on the server while the user is browsing a website. When a user visits a website, the server creates a session ID for that user. This session ID is used to identify the user as they move from one page to another. The actual data is stored on the server and lasts only for a short time, usually until the browser is closed.

Example in web development:

1. When a user logs in to a website.
2. The server stores the user's login details in a session.
3. Session helps the website know that the user is still logged in as they move between pages.

Sessions are commonly used for authentication and security purposes.

What is a Cookie?

A cookie is a small piece of data that is stored in the user's web browser. Cookies are created by the server and saved on the client's computer. Each time the user visits the website again, the browser sends the cookie back to the server. Cookies can last for a specific period of time, even after the browser is closed.

Example in web development:

1. Remembering a user's username
2. Saving language or theme preference
3. "Remember me" feature on login pages

Cookies are mainly used to remember user information and preferences.

Differences Between Session and Cookie

S/N	SESSION	COOKIE
1.	It is stored on the server	It is stored on the user's browser
2.	It is more secure	It is less secure
3.	Temporary and ends when browser closes	Can last for a long time
4.	User cannot access session data directly	User can view and delete cookies
5.	Best for login and sensitive data	Best for preferences and tracking

In web development, sessions are used to store temporary and secure user data on the server, while cookies are used to store small pieces of data on the user's browser for a longer period. Sessions are more secure, whereas cookies are more flexible and persistent.
